

Canned Beets-

Beets are now being harvested and canned - but due to no bumper on last years crop the packers are allocating order quantities until pack is complete. We are only allowed limited quantities for each truckload order placed.

Pumpkin - also being canned- and on allocation- we can only order 1 pallet (49cs) for each order placed.

Pickled Red Cabbage- currently withdrawn from sale until packed.

Imported Canned Artichokes- Artichokes are primarily grown in Peru and Spain. No bumper from last years crop and this years pack is late getting underway- we are being out of stocked on virtually all packs, sizes - types of canned artichokes until new pack is underway- I do not have an eta at this point.
